INTERESTS

- Artificial intelligence and data
- Music and guitar
- Reading

Bearisoa RANDRIANANTENAINA

Junior Python Developer focused on AI and Data

PROFILE

Junior developer focused on Python, AI, and data, with experience in full-stack web application development. Contributed to the design and delivery of management, real-time communication, and data centralization solutions. Self-motivated, adaptable, and committed to continuous learning.

EXPERIENCE

Full-Stack Developer (Internship)

February 2025 – May 2025

GoDigital

- Contributed to the full development lifecycle of web applications based on client requirements.
- Developed an inventory system to manage products moving into and out of the warehouse and stores.
- Contributed to a garage management application, digitizing operations and service record tracking.

Full-Stack Developer (University Internship)

August 2024 – November 2024

Ministry of Public Works

- Designed and developed an internal application to modernize communication and data management during parliamentary sessions.
- Built real-time chat functionality and centralized data previously scattered across paper documents and Word files.

+ **Reduced data retrieval time from several minutes to a few seconds.**

Laravel Developer (University Internship)

September 2023 – November 2023

DSP Ambotsirohitra

- Designed and developed a human resources management application to streamline employee file processing.
- Centralized HR data and improved its accessibility and retrieval.

+ **Digitized 100% of HR file processing.**

+ **Reduced search times by more than 70% through a centralized database.**

PROJECTS

Condor

A full-stack education and career guidance application featuring data collection and structuring, semantic institution search, and career recommendations based on RIASEC profiles.

ClaReFi – Classify Reviews of Films

A full-stack AI application that classifies movie reviews as positive or negative using NLP, with a FastAPI backend and Vue.js frontend.

Rice Price Prediction

A machine learning project that predicts rice prices in Madagascar using historical data, weather conditions, and exchange rates between the Malagasy ariary and the US dollar.

Career Log

A full-stack application for tracking companies, job applications, and follow-ups during a job search.

EDUCATION

Self-directed learning in AI and Data Engineering (ongoing)

Since 2025

Independent study

Bachelor's Degree in Software Engineering and Database Administration

2025

Ecole Nationale d'Informatique (ENI), Fianarantsoa

High School Diploma, Mathematics and Physics track

2020

Lycée Notre Dame de Fatima Ambohimirary
